

MAIL VOTE, EARLY VOTE AND ELECTION DAY VOTE BY AGE GROUPS

2010, 2012, 2014, 2016

HARRIS COUNTY, TX ELECTIONS

www.hectordeleon.com

ABOUT THIS PRESENTATION

This presentation provides voting information by age group for the recent midterm and presidential elections. Providing insight about who votes and the method use to cast a ballot is critical to understanding voters behavior and enhancing stakeholders and the general public's understanding of the electorate.

The information in this presentation is based on official voting records. Voter data is public information. However, the voting data exists in a raw format. The charts and tables in this presentation were created by sorting and calculating the raw voting data.

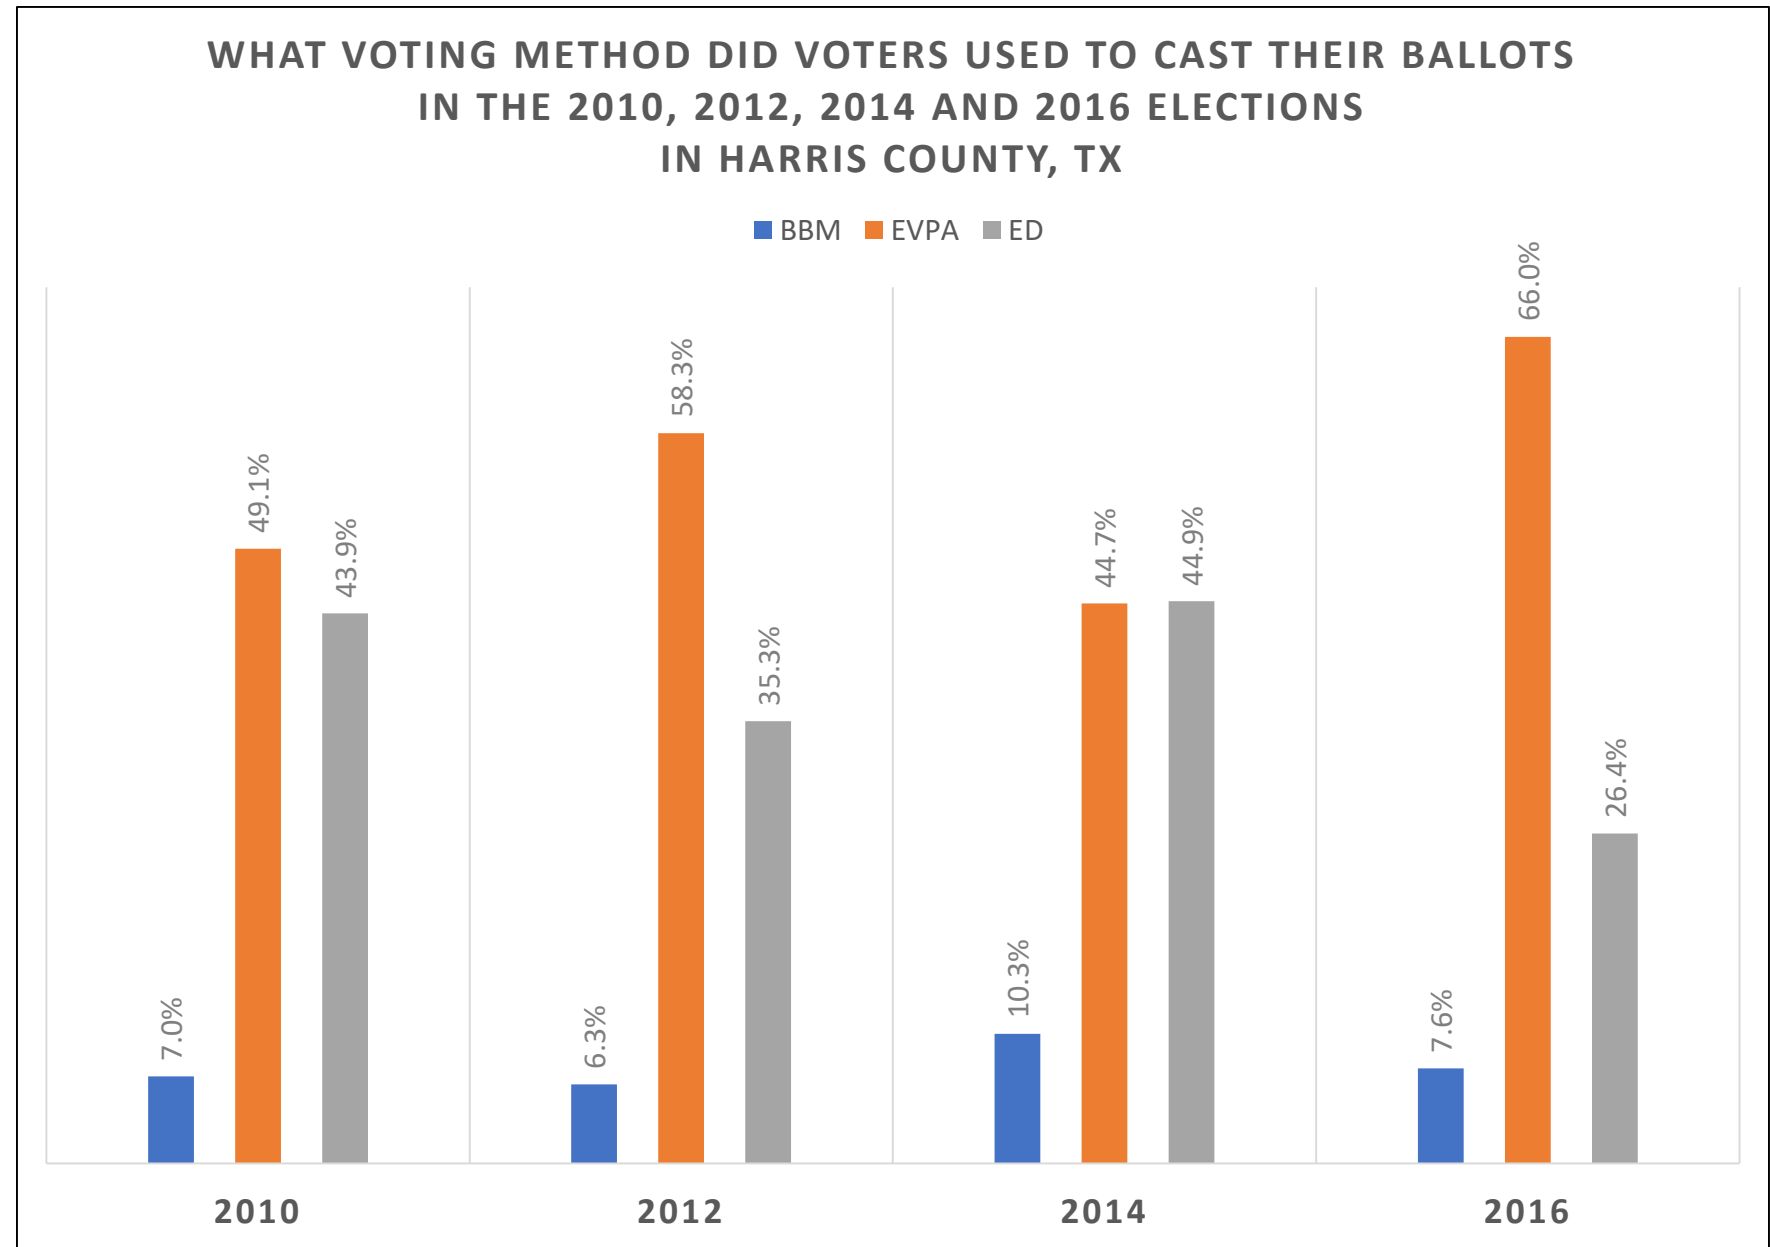

It should be noted that because some voting data does not provides the complete date of birth, the age groupings are based on birthyear. For this reason, the percentages for each age group are not one-hundred percent accurate. However, the percentages provided in this presentation are very strong approximations.

Questions about the presentation can be addressed to hectordeleon@hectordeleon.com.

WHAT VOTING METHOD DID VOTERS USED TO CAST THEIR BALLOTS IN THE 2010, 2012, 2014 AND 2016 ELECTIONS IN HARRIS COUNTY, TX

This slide show the percent of the total votes cast by mail, early and on election day in the 2010, 2012, 2014 and 2016 November elections in Harris County, TX.

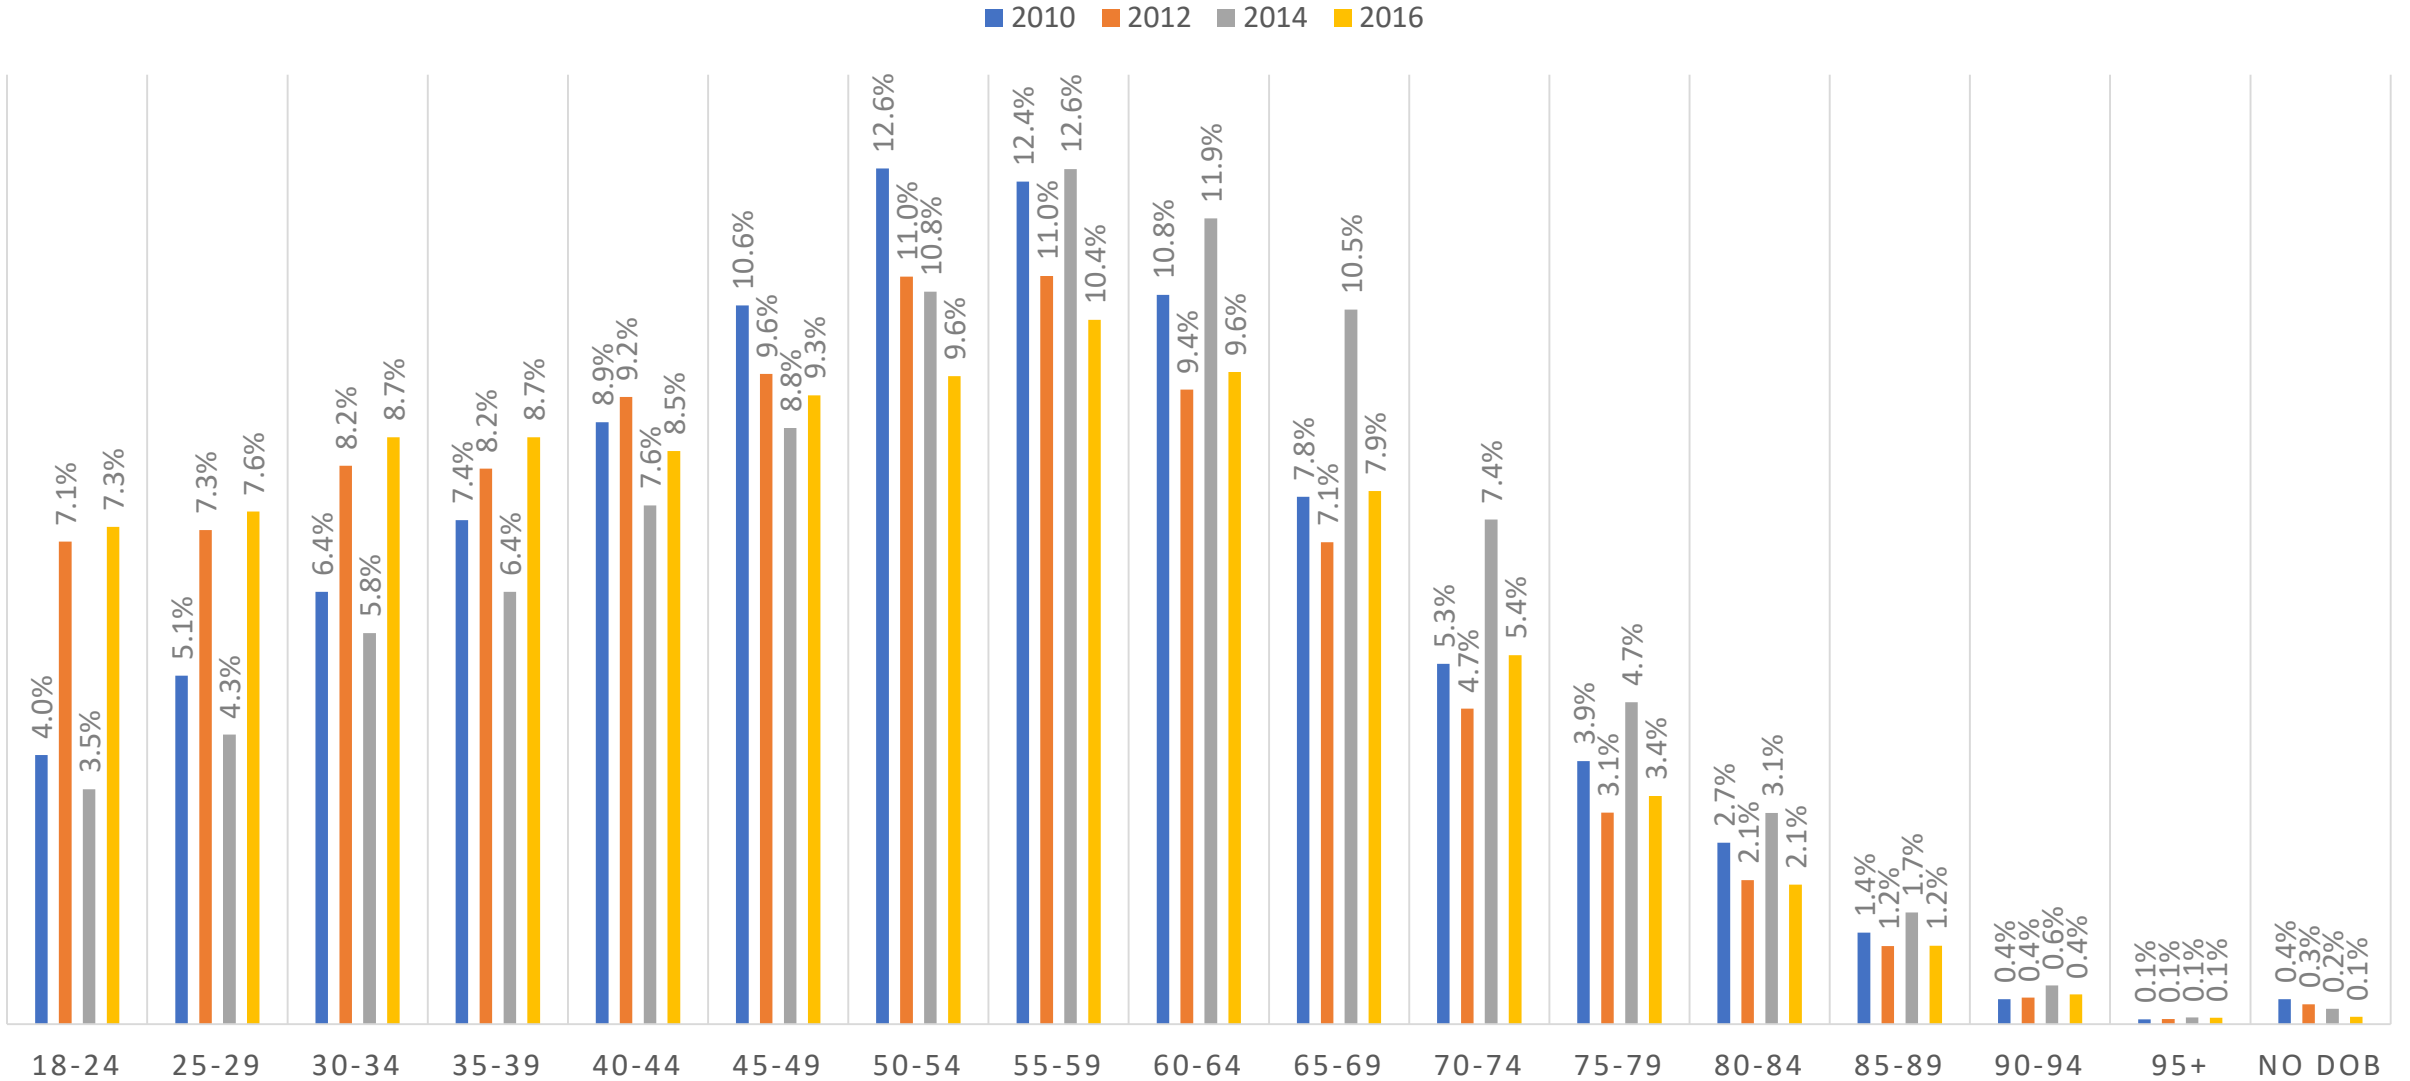

It shows that the percent of early voters during midterm elections is significant, overall it is higher in presidential elections.
